The Happiest Home Is the One You Own

What could possibly bring more happiness than a new home of your own? Moreover, what investment could you make that would bring to yourself and family a feeling of greater pride, independence and security.

There is no longer any good reason for continuing to pay rent when the same money plus a small investment will build a charming home of your own — a home completely planned and constructed in full keeping with your own ideas and family needs.

Building and financing conditions were never more favorable than now. We would urge that you who are interested in acquiring a home of your own make an effort to take advantage of the present easy financing market as a matter of self-interest and lasting satisfaction.

We offer within the covers of this book for your inspection, consideration and guidance as fine a collection of original architectural home ideas, suggestions and designs as ever before assembled under one cover. These homes were especially created for us by our architects to meet every taste and requirement pertaining to beauty of design, living comforts, conveniences and economical but thoroughly sound construction.

It is important, moreover, that any changes — an alteration of rooms, or an innovation of design — be made by thoroughly competent architects and draftsmen. Our experienced architectural department is at your service.

Complete information concerning materials and labor costs, time necessary to complete building, and other relative data, will be cheerfully furnished upon request. Please feel obligated in no way for any information you desire.

We endeavor to entirely satisfy, and satisfactorily serve you.

In order to free you from unnecessary delays and inconvenience, we have developed, and are justly proud of our careful and prompt delivery service.

Come in and see us — or telephone or write and we will make an appointment to suit your convenience. See index on page 50.

F.H.A. INSURED MORTGAGE PLAN

MAKES HOME FINANCING EASY

NATIONAL HOUSING ACT — Under the terms of the National Housing Act, insured mortgages have been made available to you. You can now build your own home with the certainty of ACTUAL ownership before you. Today you can build a home that will be yours in 10, 15, or 20 years.

YOUR RENT PAYS FOR HOME—The easiest way for you to pay for a home is to pay for it as you pay rent. The logical way is to pay monthly, out of income, an installment on the principal and the interest etc., and thus, over a given period of years, pay off the entire mortgage and have the house free of all debt. It's very much like buying a house and then renting it to yourself.

SMALL INITIAL INVESTMENT — Now you can buy or build a house on exactly that basis. Your initial investment in the property can be as little as 20 percent of its value. You may borrow the balance (up to 80 percent of the F. H. A. appraised value but not more than \$16,000) from an approved lending institution, covered by Government insurance, and repay the entire amount on a monthly basis. In most cases if your lot is fully paid for and clear of all encumbrances, the loan you can have will cover all costs of construction, etc.

LONG PERIOD FINANCING—You may take up to 20 years to pay. You may pay in 10 or 15 years, if you like. Each month you pay an installment which not only includes the interest and a part of the principal sum borrowed, but includes also a twelfth part of the annual taxes, mortgage insurance premium, and the fire and other hazard insurance premiums.

WHAT DOES IT COST?—Less than the old method of home financing, BECAUSE YOU MAY BORROW UP TO 80 PERCENT OF THE APPRAISED VALUE OF YOUR HOME. That means ONE MORTGAGE, THE END OF REFINANCING PROBLEMS, A FAIR AND GOVERNMENT-CONTROLLED INTEREST RATE AND SERVICE CHARGE.

WE CAN ASSIST YOU IN MAKING THE NECESSARY ARRANGEMENTS TO PROPERLY AND ADEQUATELY FINANCE THE HOME OF YOUR CHOICE.

WHO LENDS THE MONEY—Local financial institutions such as banks, mortgage companies, life-insurance companies, and building and loan associations, are in a position to finance the purchase if you are able to make a down payment or establish an equity of at least 20 percent of the total value. If your lot is fully paid for and clear of all encumbrances, the value of the lot can be equivalent to 20 percent of the total property cost. It is, of course, to your advantage to make a larger down payment if convenient, but your borrowing capacity on this new plan, as sponsored by the Federal Housing Administration, is 80 percent of the total value—offered in one mortgage—and repayable monthly like rent. See example below.

MONTHLY PAYMENT PLAN

Based Upon Loan of \$4400.

	10 yr.	15 yr.	20 yr.
Principal and Interest.....	\$46.67	\$34.79	\$29.04
Mortgage Insurance Fee.....	1.83	1.83	1.83
*Taxes and Assessments.....	9.17	9.17	9.17
*Fire Insurance Premium86	.86	.86
Service Charge	1.77	1.80	1.81
TOTAL.....	\$60.30	\$48.45	\$42.71

NOTE: These amounts are the entire cost for homeownership, assuming you build on a lot of approved value of \$1100 to which you have acquired title.

*These figures are based upon an average. There is always a variation in assessed valuation of property, tax rates, insurance, and other factors. But such variation will, in most cases, not exceed more than \$1.00 per month per \$1,000.00.

Call on us for actual costs and complete data.

OWN YOUR HOME — Thus, there is today placed before you a broad highway to home ownership. A way that enables you to pay for your home, as you go, at a lower cost, with all the elements of safety, convenience and assurance.

Today you can build a home, knowing that you are able to make the monthly payments, and that at the end of the monthly payment period the home will be yours.

CORRECTLY PREPARED PLANS ARE ESSENTIAL TO GOOD CONSTRUCTION

The first requisite in the erection of a home is a set of complete and accurate plans. This practice is universally accepted and is a most important and fundamental method adhered to by experienced builders. It is essential, safe, and economical to first construct the house on paper. Accurate plans and specifications must be submitted to the Federal Housing Administration for their approval when you apply for an insured mortgage loan on a new home.

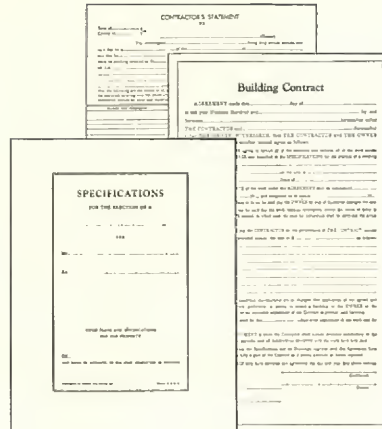

EXPERIENCED DESIGNERS

Years of experience in house planning and construction and an architectural department composed of skilled draughtsmen, architects, and engineers, are the elements upon which plans of the utmost accuracy and completeness in regard to design, strength, durability, and comfort and home conveniences, are created. These specimen working drawings illustrate the craftsmanship and completeness of our plans.

BLUE PRINT PLANS

Our blue print plans include the following complete drawings for each design:

Basement or foundation plan, first floor plan, second floor plan, front elevation, right side elevation, left side elevation, rear elevation, sections and detailed drawings, framing plans complete. All working plans are drawn to standard scales. Blue prints for each design are available.

REVERSED PLANS

Obviously, a plan designed for a lot facing east will not result in the best exposure when your lot fronts to the west. We will therefore, furnish you with an additional set of reversed blue prints. If this change is required. Ask us for full particulars.

SUPPLEMENTARY DETAILS

Further supplementary details for any of our plans will be furnished upon request.

CHANGES IN PLANS

Any of these plans can be revised to suit your special requirements.

SPECIAL PLANS TO ORDER

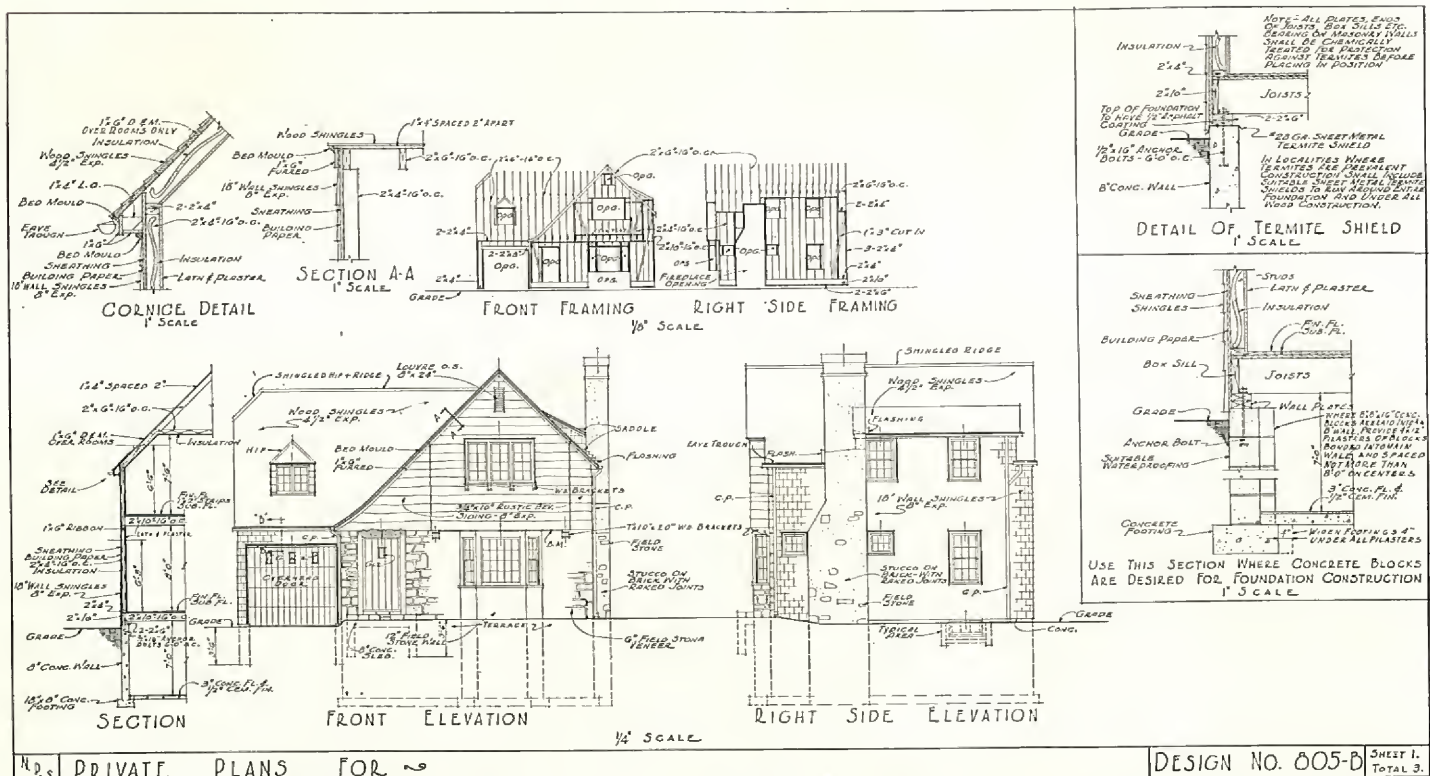

We are prepared to furnish accurate working drawings made according to your own ideas and requirements.

SPECIFICATIONS

Specifications are statements of particulars which tell what you are going to receive in materials and workmanship for the construction of your home. The stability, quality, and cost of your home will be directly affected by the materials selected and the workmanship you receive. Our specification forms are thorough and complete. Our trade knowledge is at your service — and — we are glad to assist you in the specification of materials.
